|                                                                    |                                          |
|--------------------------------------------------------------------|------------------------------------------|
| HD display size:<br>7 inch                                         | Wavelength:<br>1064nm                    |
| Laser type:<br>YAG                                                 | Pulse width:<br>0.1 - 10 ms              |
| Cooling method:<br>Air & Water cooling                             | Frequency:<br>0 - 20 Hz                  |
| Laser power:<br>200 W                                              | Max output energy:<br>100 J / 150 J      |
| Welding depth:<br>0.1 - 2.0 mm                                     | Spot size adjustment range:<br>0.1 - 3mm |
| Rated power:<br>AC 220 $\pm$ 5%; 50 Hz /<br>AC 110 $\pm$ 5%; 60 Hz | Power consumption:<br>3500 W             |

## Customization

### Color

Tailor Your Machine's Appearance To Your Style

Customize your own logo

Personalize with solid colors

Mix & match colors

### Protective Curtains

Better Protection, Safer Peace Of Mind

Install protective leather curtains — Safety meets sophistication

### Customized System

Personalized Language & Logo Options

Language customization

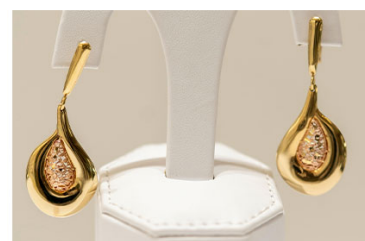

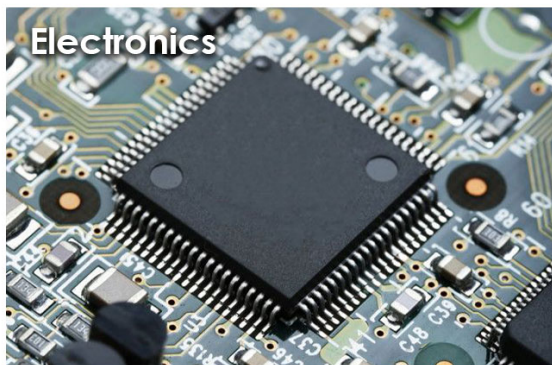

Customize your unique Logo startup screen
